Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this

Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claim 16 is rejected under 35 U.S.C. 102(e) as being anticipated by Stein [US 5,963,872].

Stein discloses an apparatus for adding functionality to a portable electronic device [250] comprising: a housing [131] to be accepted by a housing port [opening 373] of a portable electronic device [250], the housing having an interior portion; and a hardware interface connector [374] positioned within the interior portion of the housing to be accepted by a hardware interface port of the portable device wherein the hardware interface connector and the hardware interface port positioned within the interior of the housing [figure 15].

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 2841

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 6-11, 14 and 17-18 rejected under 35 U.S.C. 103(a) as being unpatentable over Stein [US 6,424,722].

Stein discloses an apparatus for adding functionality to a portable electronic device [250] comprising: a housing [131] to be accepted by a housing port [opening 373] of a portable electronic device [250], the housing having an interior portion; and a hardware interface connector [374] positioned within the interior portion of the housing to be accepted by a hardware interface port of the portable device wherein the hardware interface connector and the hardware interface port positioned within the interior of the housing [figure 15].

Stein discloses the claimed invention except for the specific number of pins used on the interface connector and their specific arrangement.

It would have been obvious to a person having ordinary skill in the art at the time invention was made that the number of pins used and their specific arrangement would have been an obvious design consideration based on the specific device intended to be connected to the adapter to be connected to the portable electronic device.

The specific method steps claimed would have been necessitated by the product structure.

Response to Arguments

Art Unit: 2841

Applicant's arguments with respect to claims 6-11, 14 and 16-18 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Darden et al. [US Re. 34,369] ; Ota et al. [US 6,743,104] ; Park [US 6,654,842] ; Helot [US 6,407,914] ; Hanson [US 6,091,571].
